**RE: Ban use of antibiotics in agriculture**

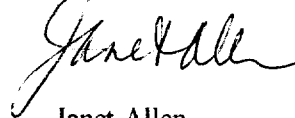

Dear Dr. Henney:

I urge you to limit the new uses of antibiotics in agriculture and limit their overuse both in human medicine and in animal feeds, as recommended by the World Health Organization and the Centers for Disease Control.

Several European countries are ahead of us in this issue and have found that they can raise animals successfully without using antibiotics. It is extremely important for the health of our children, grandchildren, and future generations that we use these wonderful medicines responsibly.

Thank you for your consideration in this important matter.

Sincerely,

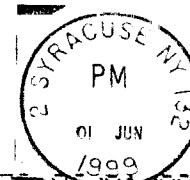

Janet Allen
